## What about me?

*Let me introduce myself.  
I am a young architect  
in love with people, cities and their  
history. You will easily find me  
sitting in a square or walking in a  
street, focused on understanding  
the social aspects hidden behind the  
surface of a city. This attitude has  
finally brought me to work as a landscape  
architect and to be passionate about  
public spaces and public buildings.*
